Ask yourself these questions:

Do you know if your web content is well optimised?

Is your web content written around effective keywords?

Do you review your web content on a regular basis? Do you compare it to your competitors?

Do the Title Tags for each page contain important key words?

Are your important keywords and phrases included in the content of each page?

Do you use H1, H2, H3 and H4 Heading Tags throughout the website?

Do you know what Heading Tags are and why you need them through your website?

Do you have hyperlinks throughout your website and do they contain keywords?

Do hyperlinks contain relevant text and accurately describe the content at the other end of the link?

Can you reach all key content within one or two clicks from any page?

Is your website listed in important directories?

Do you get good customer feedback on your web content?

Are you happy with the quality of your web content or is it holding you back in business?
